

Novyx

BARBERSHOP

BARBER GUIDE

Staff Mode Handbook

Everything you need to run your chair — clock in, manage your queue, set prices, send receipts, and clock out.

For: Barbers using the shop tablet

No login needed: just tap your name and go

Version: 1.0 · **Issued:** June 2026

KEEP THIS HANDY AT THE COUNTER

WELCOME

Before you start

This handbook shows you how to use the Novyx tablet at your chair. It's simple: you tap your name, choose what you're cutting today, and the app keeps your queue in order while you work.

You don't need a password or an account. The tablet stays on the staff screen all day, and anyone working picks their own name to open their queue. Each chapter is short, with a picture and the exact buttons to tap.

THE ONE RULE

Tap **your own name** only. Everything you do — cuts, prices, breaks — is recorded under the name you pick, and that's how your pay is worked out. The **Admin** › link in the top corner is for the shop owner; you don't need it.

Your day in five steps

1. **Pick your name** on the tablet.
2. **Clock in** — choose the services you'll do today.
3. **Serve customers** — start the next person, cut, tap done.
4. **Take breaks** when you need to — you'll be hidden from new customers.
5. **End your shift** when you're finished.

CONTENTS

What's inside

1 Find your name & open your queue

2 Clock in — pick your services

3 Your queue screen, explained

4 Serving customers

5 Prices, discounts & receipts

6 Cancelling a customer

7 Taking a break

8 Ending your shift

A Button cheat-sheet & tips

CHAPTER 1

Find your name & open your queue

What this is: The home screen on the shop tablet. Everyone working picks their name here.

"Who's on shift?" — tap your name to begin.

Each barber has a row. The coloured dot tells you their status at a glance:

WHAT YOU SEE	WHAT IT MEANS
● On shift · Free now	Working, with no one waiting. Tap Open queue → to see your chair.
● On shift · X in queue	Working, with customers waiting. The number is how many.
● Off shift	Not started yet. Tap Clock in → to start your shift.

- 1 Find your name in the list.
- 2 If you haven't started yet, tap **Clock in →** (go to Chapter 2).
- 3 If you're already on shift, tap **Open queue →** to jump straight to your customers.

GOOD TO KNOW
This page updates by itself — the green "Live · updates automatically" line means you never need to refresh it.

CHAPTER 2

Clock in — pick your services

What this is: Before customers can choose you, tell the app which cuts you're offering today.

 **Clock in · Hafiz**

[Admin >](#)

Hafiz

Pick the services for this shift.

☐ Beard Trim
~15 min

RM 15.00

☐ Kids Cut
~20 min

RM 18.00

☒ Buzz Cut
~20 min

RM 20.00

☒ Uppercut
~35 min

RM 35.00

☐ Undercut
~35 min

RM 35.00

☐ Modern Mullet
~30 min

RM 40.00

☒ Haircut + Beard
~45 min

RM 45.00

Start shift →

Tap the services you'll do — selected ones turn green with a tick.

- 1 Tap each service you'll offer this shift. Tap again to unselect. Pick as many as you like.
- 2 Selected services turn **green with a tick** .

3

When you're happy, tap **Start shift** →.

HEADS UP

You must pick at least one service. If you tap **Start shift** → with none selected, you'll see "**Pick services — Select at least one service for this shift.**"

WHY IT MATTERS

Customers only see — and can only book — the services you tick here. If you don't offer beard trims today, leave that one unticked and no one can pick it.

CHAPTER 3

Your queue screen, explained

What this is: Your main screen for the whole shift. Everything you need is here.

The queue screen while serving a customer.

From top to bottom:

AREA	WHAT IT SHOWS
Live · [you] on shift	Confirms you're clocked in, when you started, and how many people are waiting.
End shift	Top-right. Finishes your shift (Chapter 8).
 Take a break	Hide yourself from new customers for a while (Chapter 7).
Now serving	The customer in your chair right now, their service and price, and the buttons to finish or change the price.
Big green button	The main button at the bottom. It changes depending on what's happening — see Chapter 4.
Up next · X	The waiting list, in order. Each row shows the name, service and price.

YOU DON'T ADD CUSTOMERS

Customers add themselves by scanning the shop's QR code and picking you. They appear in your **Up next** list automatically — you just serve them in order.

CHAPTER 4

Serving customers

What this is: The simple loop you repeat all day — start the next person, cut, tap done.

People waiting in "Up next". The big button reads "Start next customer →".

- 1 When your chair is empty, tap **Start next customer** →. The first person in **Up next** moves into **Now serving**.
- 2 Cut their hair.
- 3 When you're finished, tap **Done** ✓. They're checked out and the next person can begin.
- 4 Tap **Start next customer** → again for the next one, and so on.

The big green button always tells you what to do next:

BUTTON SAYS	MEANING
Start next customer →	Your chair is empty and someone is waiting. Tap to begin them.
Done ✓	Someone's in your chair and the price is set. Tap to finish & check out.
Set the price first	A custom-price customer is in your chair — enter their price before you can finish (Chapter 5).
No one waiting	Your queue is empty. Nothing to do but wait for the next customer.

CHAPTER 5

Prices, discounts & receipts

What this is: How to set or change what a customer pays, and how to text them a receipt.

5.1 Custom-price customers

Some customers choose "**Custom service**" because they're not sure what they want — you decide the price. They show as **Custom** in the queue, and when they're in your chair you'll see a price box.

Queue · Hafiz Admin >

● Live · Hafiz on shift
Since 10:01 PM · 2 in queue End shift

Take a break

NOW SERVING
Daniel Tan
Custom service · enter the price to finish

Price e.g. 25.00 Set price

Cancel

Set the price first

Up next · 1

2 Faiz Rahman
Uppercut RM 31.50 ×

Type the price, tap "Set price", then "Done ✓".

- 1 Type the amount in the **Price e.g. 25.00** box.
- 2 Tap **Set price**. The big button changes from "Set the price first" to **Done ✓**.
- 3 Tap **Done ✓** to finish.

5.2 Adding or reducing a charge

For any customer you can nudge the price up or down — for example a little extra for beard work, or a small discount for a quick trim. Tap **+ Add charge** or **– Reduce** on the customer.

The screenshot shows a mobile app interface for managing a queue. At the top, it says 'Queue · Hafiz' with an 'Admin >' link. Below this, it indicates 'Live · Hafiz on shift' and 'Since 10:01 PM · 3 in queue', with an 'End shift' button. A 'Take a break' button is also visible. The main section is titled 'NOW SERVING' and features a white 'Adjust price' dialog box. This dialog box shows the current customer 'Ahmad Hassan' with a price of 'now RM 20.00'. It has two buttons: '+ Add charge' and '– Reduce'. Below these is a text input field labeled 'Amount (RM)' containing the value '5.00'. A note states 'Any discount re-applies to the new subtotal automatically.' At the bottom of the dialog are 'Cancel' and 'Apply' buttons. Below the dialog, the 'Up next · 2' section lists two customers: 'Daniel Tan' with 'Custom service' and a 'Custom' button, and 'Faiz Rahman' with 'Uppercut' and a price of 'RM 31.50'. Both have red 'X' buttons next to them.

The "Adjust price" box — choose add or reduce, type the amount, tap Apply.

- 1 Choose **+ Add charge** (more) or **– Reduce** (less).
- 2 Type the **Amount (RM)**.
- 3 Tap **Apply**. The new price shows on the customer straight away.

You can also tap the price on anyone in the **Up next** list to adjust it before they even sit down.

ABOUT DISCOUNT CODES

If a customer entered a promo code when they joined, the discount is already applied — you'll see it noted on their card. If you add or reduce a charge, the discount re-calculates on the new amount **automatically**. You don't do anything extra.

5.3 Sending a WhatsApp receipt

After a cut you can text the customer a tidy receipt. On the customer in your chair, tap

Send WhatsApp receipt →. WhatsApp opens with the service, price and queue number already written — just hit send.

IF NOTHING HAPPENS

You'll need WhatsApp on the device. If it's missing you'll see "**WhatsApp not installed — Install WhatsApp to send receipts.**" Sending a receipt is optional; it doesn't affect checking the customer out.

CHAPTER 6

Cancelling a customer

What this is: Removing someone who left, no-showed, or was added by mistake — without charging them.

6.1 Someone waiting in the queue

- 1 Find them in the **Up next** list.
- 2 Tap the red X on their row.
- 3 Confirm "**Cancel [name]? — Removes them from the queue.**"

6.2 Someone already in your chair

- 1 On the **Now serving** card, tap **Cancel**.
- 2 Confirm "**Cancel [name]? — No commission will be recorded.**"

CANCEL VS. DONE

Done ✓ means the cut happened and the customer paid — it counts toward your earnings. **Cancel** means nothing was charged and nothing is recorded. Only tap **Done ✓** for cuts you actually finished.

CHAPTER 7

Taking a break

What this is: Step away for a rest, prayer, or lunch. New customers can't pick you while you're on break.

While on break you're hidden from customers. Tap "Continue shift" to come back.

- 1 Tap  **Take a break** near the top of your queue screen.
- 2 A banner shows **On break · hidden from customers**. New customers can no longer choose you.
- 3 When you're ready, tap **Continue shift** to start taking customers again.

YOU'LL SEE	MEANING
Resting since HH:MM	Your break time is being counted from this moment (your chair was empty).
Timer starts once you finish the remaining queue	You still have customers waiting — finish them first, then your break time begins.

BREAKS ARE YOURS
Taking a break doesn't end your shift — you stay clocked in. It just stops new people from joining your line while you're away.

CHAPTER 8

Ending your shift

What this is: Clocking out at the end of the day.

- 1 Tap **End shift** at the top-right of your queue screen.
- 2 You stop appearing to new customers, and your hours stop counting.
- 3 If anyone is still in your line, you can finish them — the screen shows "**Shift ended · finishing remaining**" until your queue is clear.

FINISH YOUR CURRENT CUSTOMER FIRST

If someone is in your chair, tap **Done ✓** (or **Cancel**) before you end your shift, so their cut is recorded correctly.

THAT'S IT

Once your queue is empty after ending, you're clocked out. The tablet returns to the staff list, ready for the next barber.

APPENDIX A

Button cheat-sheet & tips

A.1 The dots on the staff list

DOT	MEANING
 Green	On shift, free — no one waiting.
 Amber	On shift, with customers in the queue.
 Grey	Off shift — not started yet.

A.2 Every button, in one place

BUTTON	WHAT IT DOES
	Start your shift (pick services first).
	Open your chair when already on shift.
	Begin your shift after choosing services.
	Bring the next waiting person into your chair.
	Finish the cut and check the customer out (counts for your pay).
	Lock in the price for a custom-service customer.
 / 	Nudge a customer's price up or down.
	Text the customer their receipt (optional).
 / Continue shift	Pause / resume taking new customers.
 / ✕	Remove a customer without charging them.
	Clock out for the day.

A.3 Quick tips

- Always pick **your own name** — your cuts and pay depend on it.
- Serve in order: **Start next customer** →, cut, **Done** ✓, repeat.
- Use **Done** ✓ only for real, finished cuts. Use **Cancel** for no-shows.
- Custom customer? **Set the price** before you can tap Done.

- Going away for a bit? **Take a break** so no one new joins your line.
- Don't worry about the **Admin** > link — that's for the owner.
